

## The powerful Pallet Rail Type 720!

The pallet rail Type 720 is a universal rail, that is often used for pallet transport. With this rail simple roller- or flow through-tracks can be realized for Euro Pallets, boxes or other casings with suitable bottoms.

Whether for in-plant transport, the interlinking of workstations or as lateral guide rail – the pallet rail type 720 is versatile applicable.

The pallet rail consists of a sendzimier galvanized U-section, 55 mm high and 80 mm wide. The profiles are equipped with roles of  $\varnothing$  50 mm in pitches of 52, 78, 104, 130, 156 mm etc.

Two further drill holes in the ground are for mounting upon sub-constructions or direct doweling to the ground.

Stock Length: 6.006 mm

## Pallet Rail Type 720 – Technical Data

Applications	Pallet transport, internal transport, linking of workstations, lateral guide rails
Rail material	Senzimir galvanized U-sections
Load capacity per roller	Steel roller 150 kg/each
Moment of resistance – section in cm <sup>3</sup>	4,6
Diameter in mm	50
Pitch in mm	52,78,104,130,156, etc.
